

HIGH QUALITY FIREARMS

INTRO

Dear Customer,

thank you for your interest in in GRAND POWER products. This catalogue represents latest results of our effort to manufacture handguns of top quality, which will provide lifetime of joy and safety for our customers, ranging from IPSC, IDPA and other disciplines sport shooters, as well as law enforcement / military professionals and those who take their safety and safety of their loved ones seriously.

GRAND POWER company was founded in Slovakia in 2002. We are proudly building on long tradition of Czechoslovak firearms, utilizing our own and unique designs and construction solutions, using state of the art technologies and materials, employing skilful and passionate workers who live by our motto "Passion for precision."

Through hard work and high standards, our company achieved worldwide recognition with our core model – the K100 – most universal model of our product range, along with our flagship piece – The X-calibur – top notch race gun. During short time since the beginning of its production, the X-calibur brought us countless medals at many IPSC and other discipline matches and continues to be an inseparable part of success for many sport shooters all over the world.

To cover the needs of our valued customers and wide variety of their needs and wishes, our product range now consists of more than 30 models of pistols in all major calibers from less lethal ammunition, through rimfire to centrefire cartridges, including cult 10mm AUTO.

GRAND POWER is amongst most successful Slovak exporters, with abroad sales reaching 99% of its production, mostly on markets of USA, Russia and EU countries.

GRAND POWER products are modern and very high-quality firearms. Their exceptionality rests in unique locking mechanism, conducted via barrel rotation on (also) rotational cross pin. This solution is hugely different from other rotational barrel systems on the market and provides superior reliability, significantly reduced recoil and muzzle flip and improves accuracy and overall shooting comfort. Same level of comfort is provided for both left and right-handed shooters, due to fully ambidextrous controls right from the factory, without any need of additional modifications to the gun and is increased by four exchangeable grip backstraps to accommodate any hand.

Jaroslav Kuracina
GRAND POWER Ltd.
Owner & CEO

INTRO

Our pistols incorporate steel frame inside of a durable, exceptionally strong polyamide grip. Steel frame as well as slide are manufactured solely by milling and drilling from single piece of high-quality CrMoV steel, heat treated to achieve the best results possible. No cast frame, only honest steel. Our barrels are made at our factory utilizing accurate baton rifling method. Minimum tolerances on key dimensions result in superb accuracy, combined with sufficient space for all moving parts for reliability make for robust and reliable guns with excellent accuracy. All surfaces are treated by QPQ – Tenifer technology (up to 750 HV) to provide exceptional resistance to corrosion as well as wear and tear during years of hard use.

X-CALIBUR MATCH

The X-Calibur is our well known, out of the box competition ready, flagship. We offer two new modifications to further accommodate to needs of our customers, who asked for heavier version as well as for option to mount a red dot sight, in order to allow them to use their favourite X-Calibur for more and more disciplines in shooting sport.

There are two new options available – Match and Match CO, standing for Carry Optics. They both possess additional weight of 350g in form of massive steel dust cover, including standard picatinny rail for any accessories shooter may want to attach to his X-Calibur. Additionally, the CO version slide is milled to accept mount base for red dot sight. The red dot mount base can be replaced by micrometric rear sight if needed. Additional weight on the front further reduces muzzle flip and recoil, making accurate follow-up shots significantly easier. Of course, the main feature of every X-Calibur, rotational barrel is present also on both Match and Match CO variants. Our X-Caliburs are equipped with clean, crisp trigger with short reset. SA/DA operation fits most shooting disciplines.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Triger pull weight:	15-18 N/30-35 N
Overall lenght:	220 mm
Height without magazine:	144 mm
Width:	48 mm
Barrel lenght:	127 mm
Weight w/o magazine:	872 g
Weight w empty magazine:	885 g
Standard magazine capacity:	15

X-CALIBUR MATCH

X-CALIBUR

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Triger pull weight:	15-18 N/30-35 N
Overall lenght:	220 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel lenght:	126,7 mm
Weight w/o magazine:	797 g
Weight w empty magazine:	885 g
Standard magazine capacity:	15

The X-calibur, being our flagship model, is ready for competition out of the box. Aggressive slide milling reduces weight of the slide and can be used for press checks. Milling also reveals heavy, fluted barrel offering attractive, yet functional design and compliments X-caliburs exceptional shooting performance. Fiber optic front sight combined with micrometric rear sight allow for fast sight acquisition and precise adjustment. We consider crisp trigger with short reset a standard on all of our pistols, however these are further enhanced for our X-calibur, giving you the best tool for your sport shooting.

X-CALIBUR

K100 & P1 & P11

K100

K100, our core model, with SA/DA trigger mechanism and rotational barrel is a result of incorporating the most strict requirements imposed on universal guns with ergonomics suitable for shooters of practical disciplines as well as for special units of LE/military forces. Dust cover is fitted with universal tactical accessory rail. Mk12 frame offers four interchangeable backstraps.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	202,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	108 mm
Weight w/o magazine:	740 g
Weight w empty magazine:	820 g
Standard magazine capacity:	15

P1

P1 is compact version of the K100, offering the same reliability, ergonomics and benefits of rotational barrel design in shorter package, more suitable for every day carry. P1 also maintains the same Mk12 grip and 15+1 magazine capacity as the K100 and offers similar shooting experience and accuracy. Despite its shorter size, the P1 can compete with much larger pistols with ease.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	187,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	93 mm
Weight w/o magazine:	690 g
Weight w empty magazine:	770 g
Standard magazine capacity:	15

P11

P11, our sub-compact 9mm pistols, maintains fully ambidextrous operation, rotational barrel design and robust, reliable construction, materials and craftsmanship than its bigger brothers, while concealability is increased by shortening of the barrel and slide, as well as accommodating shorter and narrower grip.

Caliber:	9 mm Luger
Trigger mechanism:	SA / DA
Trigger pull weight:	20-25 N/35-40 N
Overall length:	179 mm
Height without magazine:	118 mm
Width:	36 mm
Barrel length:	85 mm
Weight w/o magazine:	640 g
Weight w empty magazine:	737 g
Standard magazine capacity:	12

Q100 & Q1 & Q1S

The Q100 brings striker fire to GRAND POWER production line. Bearing all advantages of our famous K100 service pistols, the Q100 offers the same rotational barrel reducing perceived recoil and muzzle flip, provides fully ambidextrous controls, Mk 12 frame with four interchangeable backstraps, 15 magazine capacity, tools free field strip and adds up flat profile trigger with smooth and consistent trigger pull for accurate, repeatable shots. In addition to safety mechanisms known from K100, trigger safety is present on striker fire pistols to ensure safe operation.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall length:	202 mm
Height without magazine:	133 mm
Width:	34 mm
Barrel length:	108 mm
Weight w/o magazine:	760 g
Standard magazine capacity:	15

The Q1, compact version of the Q100, shares many of benefits of its bigger brother in shorter, easy to conceal and carry form. Fully ambidextrous controls, four interchangeable backstraps as well as 15+1 magazine capacity are maintained, while difference in accuracy and overall performance of the pistols is virtually negligible.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall length:	187 mm
Height without magazine:	133 mm
Width:	34 mm
Barrel length:	96 mm
Weight w/o magazine:	680 g
Standard magazine capacity:	15

For everyday carry and better concealability, the Q1S combines shorter, smaller frame you may find on our P11 with slide and barrel of the Q1, offering great concealability yet still offering excellent 12+1 magazine capacity, as well as maintaining benefits of rotational barrel and flat profile trigger of the Q1.

Caliber:	9 mm Luger
Trigger mechanism:	N / A
Triger pull weight:	16 N
Overall length:	183 mm
Height without magazine:	119 mm
Width:	34 mm
Barrel length:	93 mm
Weight w/o magazine:	650 g
Standard magazine capacity:	12

K22 & CP22

K22

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall length:	211,5 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	127 mm
Weight w/o magazine:	670 g
Weight w empty magazine:	720 g
Standard magazine capacity:	10

The K22 is a semi-automatic pistol chambered in affordable .22LR caliber, offering solid steel frame, slide and bull barrel for long and reliable service. Grip, including 4 interchangeable backstraps, fully ambidextrous controls, sights and accessory options are shared with our 9mm pistols for easy adaptation as a training tool that allows shooter to train more for less.

CP22

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	20-25N / 35-40 N
Overall length:	173 mm
Height without magazine:	131 mm
Width:	36 mm
Barrel length:	94 mm
Weight w/o magazine:	595 g
Standard magazine capacity:	10

Built to very same standards and from same materials as all of our rimfire pistols, CP22 is the most compact .22LR pistol in our portfolio. Built on P11 size polymer grip, we managed to maintain fully ambidextrous controls and steel slide, frame as well as threaded bull barrel equipped with knurled thread protector. Despite its small size, you will get robust and reliable pistol in affordable caliber.

K22 TS

The K22 TS, TS standing for Target Sport, is our answer to suggestions of long range rimfire shooters, however, we managed to maintain other benefits of GRAND POWER rimfire pistol as well.

The K22 TS is manufactured in three barrel length variants, 5", 6" and 8" in order to accommodate to shooters needs as well as local legislation. Long barrel provides for excellent accuracy and we accompanied it with fully adjustable micrometric type rear sight as well as fibre optic front sight. The barrel is threaded for accessories. Thread protector is included as standard.

Our crisp SA/DA trigger is famous for short reset and further enhances accuracy of follow-up shots.

Unique slide design makes it light, despite the fact that it is made from a single piece of steel, unlike many rimfire handguns, providing great reliability as well as long life. Generous chamber access space allows easy manipulation, for example in case of ammo malfunction. To further increase durability of K22TS, it is built from same parts as our larger caliber pistols, such as steel insert and Mk12 polymer frame. For owners of other GRAND POWER pistols, full size controls with identical layout will be beneficial, making the K22 TS also great training tool. The K22 TS can also be fitted with many parts used to customize your larger caliber GRAND POWER pistols. Accessory rail is also present for your light, laser or other accessories. Interchangeable backstrap covers lanyard hole. Enlarged sport safety levers provide rest for your thumb and can be replaced by lower profile ones.

Caliber:	.22LR
Trigger mechanism:	SA / DA
Triger pull weight:	N / A
Overall length:	237,5 mm (6" version)
Height without magazine:	144 mm
Width:	36 mm
Barrel length:	5" / 6" / 8" mm
Weight w/o magazine:	712 g
Standard magazine capacity:	10

P40 & P40L 10MM AUTO

P40

Caliber:	10 mm AUTO
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall lenght:	206,5 mm
Height without magazine:	135,5 mm
Width:	36 mm
Barrel lenght:	108 mm
Weight w/o magazine:	770 g
Weight w empty magazine:	880 g
Standard magazine capacity:	14

P40L 10MM AUTO

Caliber:	10 mm AUTO
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall lenght:	228 mm
Height without magazine:	136 mm
Width:	36 mm
Barrel lenght:	127 mm
Weight w/o magazine:	875 g
Weight w empty magazine:	972 g
Standard magazine capacity:	14

The P40 offers a unique rotational barrel mechanism to those who prefer shooting with powerful 10mm AUTO rounds. Built on the latest generation ergonomic polyamide handle, more robust than standard Mk 12 grip, robust to withstand regular use of 10mm ammunition. The new rounded slide profile provides excellent handling and ergonomics.

Longer P40 L model provides even more accurate shooting and increased mass shifts centre of gravity towards muzzle to further reduce muzzle lift, which makes shooting 10mm an enjoyable experience.

P380, CP380 & LP380

GEN 2

P380

The P380 is a self-loading pistol chambered in .380 ACP caliber with SA/DA trigger mechanism, designed mainly for security services and personal protection, especially in jurisdictions that prohibit possession of larger caliber firearms. Robust barrel and steel frame insert provide long service life. Pistol is operated by direct blowback. P380 features fully ambidextrous controls and interchangeable backstraps in four sizes.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall length:	189 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	105 mm
Weight w/o magazine:	720 g
Weight w empty magazine:	780 g
Standard magazine capacity:	15

CP380

CP380 is a sub-compact version of our P380, designed mainly for personal protection. CP380 is lightweight, reliable and accurate pistol ideal for everyday carry.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall length:	179 mm
Height without magazine:	118 mm
Width:	36 mm
Barrel length:	85 mm
Weight w/o magazine:	640 g
Weight w empty magazine:	737 g
Standard magazine capacity:	12

LP380

LP380, .380 caliber, is a standard size pistol offering superior feel and performance to every user. No matter if carried on duty, for personal protection or to compete, this model offers reliability, accuracy and top quality.

Caliber:	.380 ACP
Trigger mechanism:	SA / DA
Triger pull weight:	20-25 N/35-40 N
Overall length:	216 mm
Height without magazine:	133,5 mm
Width:	36 mm
Barrel length:	135 mm
Weight w/o magazine:	791 g
Weight w empty magazine:	886 g
Standard magazine capacity:	15

STRIBOG SP9 A3

Pistol version with 8" barrel, supplied as a pistol, without a stock. STRIBOG SP9 A3 offers reliability and robustness of previous generation STRIBOGs and, in addition, brings a pair of fundamental improvements in form of semi-locked bolt with delayed action via transfer roller and non-reciprocating charging handle.

STRIBOG SP9 A3

Caliber:	9x19 Luger
Trigger mechanism:	SA
Triger pull weight:	2,7 kg
Overall lenght:	424 mm
Height without magazine:	200 mm
Width:	57 mm
Barrel lenght:	8"
Weight w/o magazine:	2,06 kg
Weight w empty magazine:	+ 53 / + 68 / + 91 g
Standard magazine capacity:	10, 20, 30

STRIBOG SP9 A3S

SP9 A3S

Caliber:	9x19 Luger
Trigger mechanism:	SA
Triger pull weight:	2,7 kg
Overall length:	316/579 mm
Height without magazine:	204 mm
Width:	57/84 mm
Barrel length:	114 mm
Weight w/o magazine:	2350 g
Weight w empty magazine:	+ 53 / + 68 / + 91 g
Standard magazine capacity:	10, 20, 30

For easy concealment, shortest SP9 A3 S version is available, measuring just 316mm with the stock folded (without muzzle device). All internal parts have been designed for reliable function even with shorter barrel. The SP9 A3 S can be fitted with 3-lug barrel mounting system as well as with threaded barrel with protective end cap, utilizing M13.5x1 LH thread pitch. FRN folding stock may be replaced by end cap to further increase concealability.

For such a small package, we managed to keep nice real estate of accessory rails on 12 and 6 position, offering space for red dot sight, laser, additional grip and other accessories operator may desire.

STRIBOG SR9 A3

Carbine with 10" barrel and a folding stock from STRIBOG family offering M-LOK interface as well as picatinny rails for accessories. No matter if used for sports, home protection or just fun at the range, SR9 A3 is solid pistol caliber carbine built to last, open to modifications and customizable by many available accessories.

SR9 A3

Caliber:	9x19 Luger
Trigger mechanism:	SA
Triger pull weight:	2,7 kg
Overall lenght:	761/475 mm
Height without magazine:	200 mm
Width:	57 mm
Barrel lenght:	10"
Weight w/o magazine:	2,46 kg
Weight w empty magazine:	+ 53 / + 68 / + 91 g
Standard magazine capacity:	10, 20, 30

STRIBOG RSR A3 & RSR9A3

GEN 2

RSR A3

Available in 13" and 16" barrel length versions, RSR is aimed at competition shooters who can utilize benefits of longer barrels as well as more control over the gun during target transitions with optional upper receiver extensions/handguards. Longer barrels also allow for more precise shooting at longer distances at PCC matches. Gen2 upgrade combines significantly shorter and lighter upper receiver with our new octagonal handguard for excellent control of the gun movement in sport shooting disciplines, such as IPSC PCC.

Caliber:	9x19 Luger
Trigger mechanism:	SA
Trigger pull weight:	2,7 kg
Overall length:	13" 850/564 mm, 16" 915/629 mm
Height without magazine:	200 mm
Width:	57 mm
Barrel length:	13", 16"
Weight w/o magazine:	2530/2600 g
Weight w empty magazine:	+ 53 / + 68 / + 91 g
Standard magazine capacity:	10, 20, 30

RSR9A3 GEN2

STRIBOG TR22

Chambered in .22LR, STRIBOG TR22 available in 10", 12" and 16" barrel lengths can serve as dedicated training tool for STRIBOG line as well as plinking and recreation gun for whole family. We managed to maintain the same controls, materials and overall feel of our 9mm STRIBOGs and replicate durability and reliability of our famous K22 in affordable package that will last a lifetime. Bull barrel and full compatibility with majority of STRIBOG accessories and aftermarket parts are matter of course.

TR22

Caliber:	.22LR
Overall length:	720/770/885 mm
Height w/o magazine:	200 mm
Width:	57 mm
Barrel length:	10"/12"/16,5"
Weight:	2335g/2400g/2530g
Magazine capacity:	25

BARREL BLANKS

GRAND POWER s.r.o. is proud to manufacture barrels via button rifling for its own weapons production as well as for third parties as finished barrels as well as barrel blanks. State of the art buttoning technology and machines built specifically for our company, combined with quality 31CrMoV9 steel provide for excellent quality we are known for. High-temperature steel H13, especially designed for highly stressed automatic weapons barrels is also available.

EXTREME RESISTANCE

One of GRAND POWER K100 pistols, serial number B000776 was randomly picked for durability testing, conducted on public shooting range in Zvolen, Slovakia. The pistol was available for range visitors for testing with wide range of ammunition. Impressive result of 112 470 rounds without any major failures was achieved, with no change to bore geometry or accuracy. K100= hundred thousand shots!
