TEST FIRING

LAPUA .22 Service Center

Top shooters recommend ammunition test in the LAPUA .22 Service Center in Schönebeck!

In April 2003 LAPUA GmbH opened the NAMMO .22 Service Center, a facility equipped with the most modern technology.

Many national and international top sportsmen and sportswomen, members of shooting clubs and retailers have taken advantage of this special facility for selecting the ammunition best suited to their weapons.

We give the shooters and sportsmen/women the opportunity of testing cal. .22 ammunition of the NAMMO group's production. By using the newest technology measuring methods you can find out the best ammunition lot. You will have at your disposition for the test a wide range of "SK" and "LAPUA" ammunition lots. In different gripping devices you can clamp pistols as well as rifles.

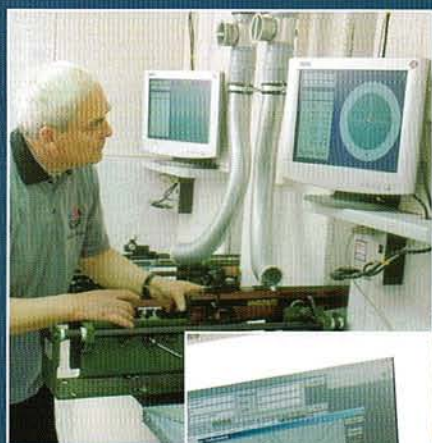

We are a guarantee of your success.

You will get further information on the LAPUA.22 Service Center by calling

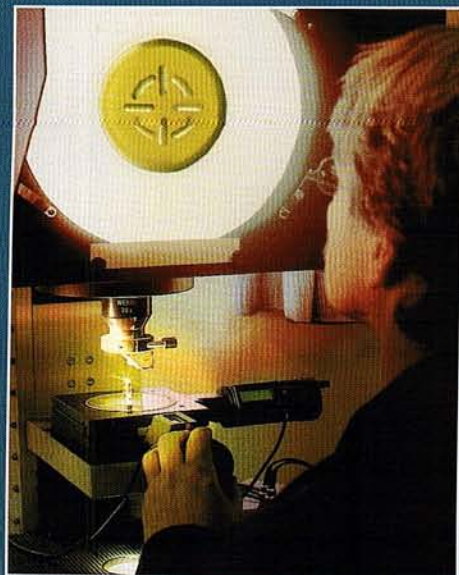

Phone number:

++ 49 (0)3928/729-100

By the way: the hit rate of finding the ammunition that is best suited is about 94 %.

No

COMPROMISES

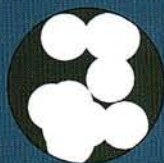

We manufacture our cartridges with the utmost care and precision. Each cartridge is looked at individually and 50 at minimum out of each batch are tested on ballistic values, gas pressure and grouping. The release of a batch for distribution only takes place when all test results are within our strict tolerance levels.

e.g. This grouping measures only 2,7 cm! (by 50 rounds shot at a distance of 50 m) the „Standard plus“ will never miss its target.

orig. Size

Standard Plus

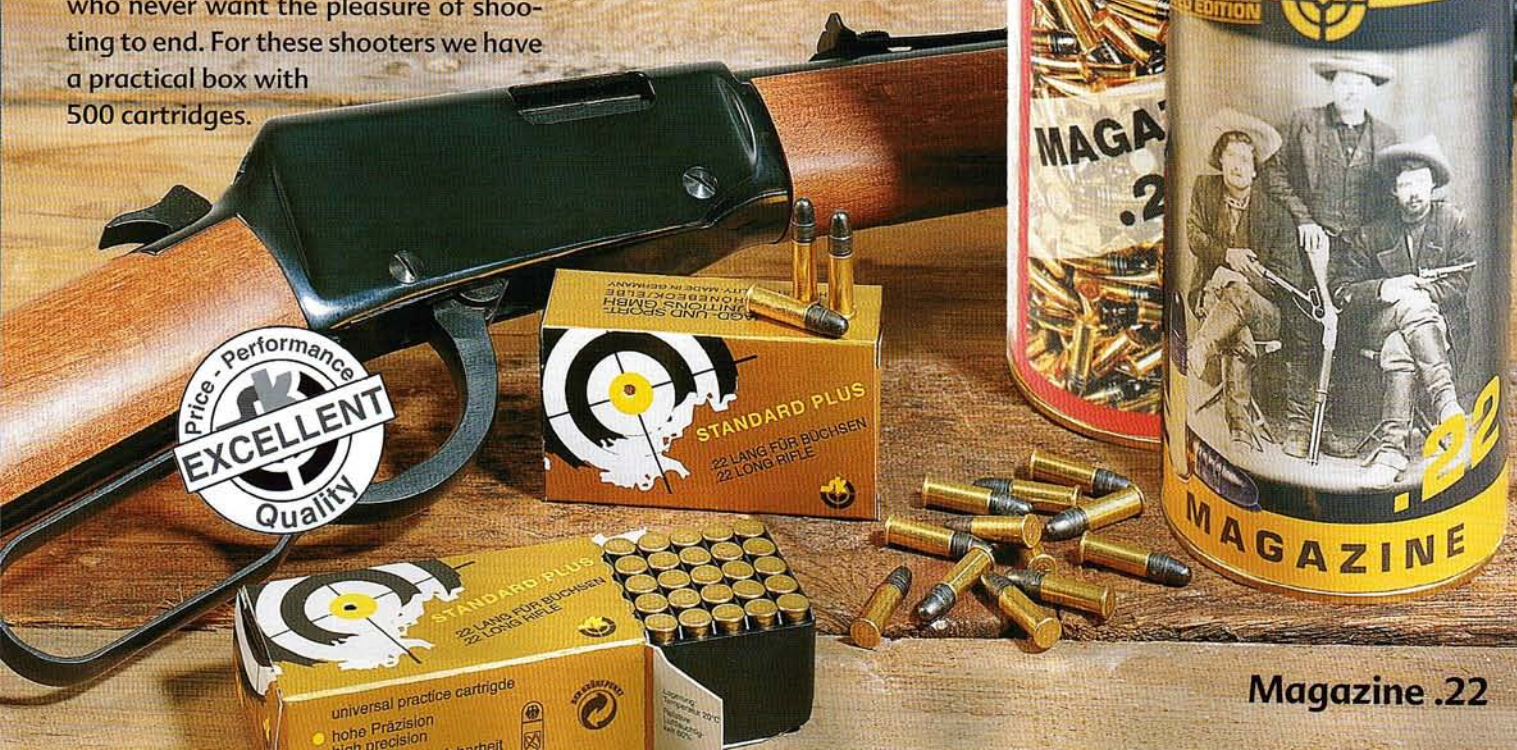

QUALITY

through Precision...

...is during production a prerequisite for an excellent cartridge. No difference, whether you try to outdo your shooting friends or just to perfect your accuracy of fire.

The „MAGAZINE .22“ is for all of those who never want the pleasure of shooting to end. For these shooters we have a practical box with 500 cartridges.

Magazine .22

THREE FOR Hunting

High Velocity Hollow-point,
High Velocity Solid & Subsonic

It's naturally for you as a hunter to carry a smallbore weapon, be it for pest control or "coup de grace" reasons.

Amongst our assortment you will find the right cartridge for every occasion. Our „High Velocity“ reaches a muzzle speed of over 385 m/sec.

The outstanding ballistic values and sensible price of our three high performance .22 calibre cartridges will also convince you, that you made the right decision.

For WINNERS

Stouping

Every shooter knows the difficulty of trying to find an ammunition, that fulfils all his needs.

Current World and German Pistol Champion
Munkhbayar Dorjsuren.

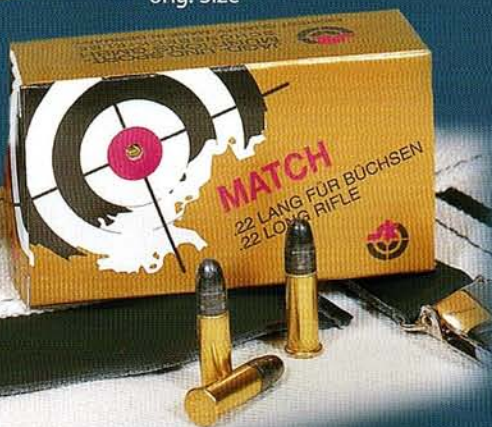

Only 16,5 mm is the size of this group of „Match 50“. (50 rounds shot at a distance of 50 m)

orig. Size

The „RIFLE MATCH“ is a match-grade cartridge with a slightly flattened bullet.

You have the choice!

... „Match“, „Rifle Match“, „Pistol Match“, and „Pistol Match Special“ are the .22 caliber cartridges for the successful marksman/woman.

Victories are strung together at national and international championships.
