

2005/2006

---

SHOOTING CLOTHING  
AND TARGET RIFLES ACCESSORIES  
FOR TARGET SHOOTERS.

No, don't worry; we have not switched to the „animal area“. But we can learn a lot from Mother Nature. „Nature as our Idol“ – is our motto. Many things we try to handle technically today have been shown by nature for years. We have understood and you have the advantage.

A hawk's eyesight, an elephant's stability, a chameleon's adaptability and a leopard's quick ability to react – these are only a few of the characteristics champions are made of. You are up to it and we supply you with the appropriate equipment.

Shooting technology, mental training and fitness are important. However, a very important ingredient to success is shooting apparel.

If you do not feel comfortable in your shooting clothing, and the material in your shooting clothing is not up to your expectations, a shooter can experience negative influences that cannot be compensated by any training.

This is why many German, European, World and Olympic Champions rely on ahg-Anschütz products. I would like to take this occasion to thank the target shooters and coaches all over the world who have assisted in the development of our ahg-range and thus also have contributed to the composition and completion of this catalogue.

I also would ask you to understand that we could not include the picture of every shooter who successfully uses our products.

Uwe Anschütz  
President of  
ahg-Anschütz Handels GmbH

# ahg-STENVAAG DESIGN Mod. Scorpion

the top class shooting jackets and pants  
for shooters demanding high quality

## ahg-STENVAAG DESIGN:

ahg-Anschütz has taken over the manufacture and sale of the well-known Stenvaag-Design Collection.

In close co-operation with the Norwegian National shooter Harald Stenvaag the Scorpion Collection was developed on the basis of the popular and successful Stenvaag-Design shooting jackets and pants.

The new Stenvaag collection mirrors the experience and the results of many World Championships as well as Olympic Games.

Made  
in  
GERMANY

**WE RELY ON STENVAAG QUALITY**

05

**ahg-Shooting Jacket  
STENVAAG-DESIGN  
Scorpion:**

High-quality leather-canvas combination with TOP GRIP padding „Made in Germany“.

- The sleeve is put in twisted for the supporting arm to guaranty a repeatedly precise and tension free positioning in any kind of disciplines.
- Many possible adjustments in height and angle of the sling fastening optimize the power flow from the sling to the rifle in prone and kneeling position.
- Asymmetric shoulder cut with suede part reduces the uncomfortable creasing in the neck area when prone positioning.
- Adjustable shoulder straps allow controlled creasing for the best fit of the butt plate on the shoulder.
- Smartly used stretch material give this shooting jacket the necessary comfort when stabilizing for positioning.
- The leather-stretch material on the upper right arm avoids that tension, which can occur in this area, does not pass over to the back; this allows the shooter to stand comfortably when positioning.
- Coloured piping in the back give this jacket a sportive touch.

Material:  
58% cotton, 42% leather.  
Inner lining: 100% cotton.

**Art.-Nr.: 167**

Made in GERMANY

Stretch material at the left forearm avoids that the jacket touches the stock in the prone position. In addition the connection between jacket and glove is stabilized. Darts guarantee better fit to the waist in the standing position.

**ahg-Shooting Pants  
STENVAAG-DESIGN:**

- The Stenvaag Pants have 2 long 2-way zippers which can be opened from top or bottom when choosing different positions.
- The hook closure on the waistband and the Velcro closure on the right pants' leg allow individual adjustments e.g. small loss of or increase in weight of the shooter.
  - The stretch material at the end of the Velcro avoids pressure on thigh and waist.
  - The stretch material in the crotch and thigh enables to a wider foot posture in kneeling position.
  - The TOP GRIP padding avoids pressure pain in kneeling position.

Material Model 1:  
100% cotton.  
Inner lining: 100% cotton.

**Art.-Nr.: 139**

Same cut as mod. 139, hip and waist are made from double canvas, pants' legs from leather.

Material Model 2:  
20% cotton, 80% leather.  
Inner lining: 100% cotton.

**Art.-Nr.: 140**

## ahg-Shooting Pants

SPECIAL and CHAMPION

- the top models

In order to comply with the most important functions of shooting pants, these pants were designed as follows:

- The yoke is especially fitted at the waist and thus guarantees the best fit in the spinal area.
- 2 long 2-way zippers which can be opened from top or bottom for different positioning.
- The hook closure on the waistband and the Velcro closure on the right pants' leg allow individual adjustments e.g. small loss of/increase in weight of the shooter.
- The stretch material at the end of the Velcro avoid pressure on thigh and waist.
- The stretch material in the crotch and thigh enables to a wider foot posture in kneeling position.
- The TOP GRIP padding avoids pressure pain in kneeling position.

- For shooting slings.

**Art.-Nr.: 336**

# ahg-SHOOTING UNDERWEAR

temperature regulating underwear

## ahg-Underwear COLD WINNER:

The COLDWINNER™ is now part of the new generation of patented technical fabrics with multiple functions. Made of the combination of 3 different materials, the COLDWINNER™ enables to fully protect the body and regulate its temperature. Sweat is immediately evacuated outside the garment, where it directly evaporates in the air. The body is thus kept dry and warm. Tests made in Canada and Europe in daily and extreme conditions (temperatures between +25°C and -22°C) have confirmed all the technical underwear qualities. These various tests prove the COLDWINNER™ efficiency and its necessity to be worn in the following sport activities: Cycling, Shooting-Sport, Mountain Bike, Crosscountry Ski, Alpine Ski, Ski-Doo, Climbing, Trekking, Sailing, etc. as well as in the everyday life. The COLDWINNER™ underwear needs to be worn close-to-the-body, on the bare skin, to get a maximum efficiency. You can wear it all year long, considering the weather conditions and the temperature variations. Despite its relative heaviness, it does bring an absolute comfort through its lightness on the skin.

Thanks to its technical structure, the COLDWINNER™ has become the thermoregulating underwear the most appropriate to all conditions.

Available in sizes: XS, S, M, L, XL, XXL.  
ahg-undershirt long.

**Art.-Nr.: 154**

ahg-underpants.

**Art.-Nr.: 155**

**COLD  
WINNER™**   
patent pending

## ahg-Shooting Vest COLD WINNER:

The proven and tested COLD WINNER underwear (art. 154 and 155) is now also available as shooting vest. The difference to the normal underwear shows in the part of the upper body of the vest, where a disturbing pressure is felt; there the material is used in twofold (2,2 mm instead of 1,1). More material consequently enlarges the volume of the vest and thus wears even more comfortably. The 2-way-zipper can be opened from the bottom; especially when shooting in kneeling position, this avoids tightness when positioning.

Thanks to its high-tech structure COLD WINNER is the one thermo-regulating underwear the most appropriate for all conditions.

Available in sizes XS, S, M, L, XL, XXL.

**Art.-Nr.: 156**

13

# ahg-SHOOTING UNDERWEAR

for a good feeling on the skin

14

## ahg-SHOOTING UNDERWEAR:

Functional and thermo underwear made of Tactel aquador. The ideal underwear for sports and leisure time – suitable not only for shooting:

Tactel aquador is a unique textile system with highly effective humidity management. It offers maximum pleasure to the skin. Tactel aquador is a unique two-layer textile system. The inner tactel layer leads the humidity away from the skin into the outer cotton layer where it evaporates.

- ▼ - With stand-up collar and zipper.
- Humidity regulation.
- Temperature regulation.
- Breathable.
- Pleasant to the skin.
- Stable in shape, elastic.
- Easy care.

# ahg-STENVAAG DESIGN

if you need reliable boots

## ahg-SHOOTING BOOTS STENVAAG:

We have once again improved our shooting boots model STENVAAG based on an intensive co-operation with the top-class shooter Harald Stenvaag and the world-wide famous boot manufacturing company Meindl. High-tech materials created boots which are highly suitable for all shooting positions.

A new buckling system on the upper stock enables an optimal stability and quick and simple snug fitting of the stock diameters. The new directing on the Velcro causes it to be less (35 %) used.

**1** Well padded tongues made of perforated material avoid pressure and guarantee a perfect air circulation.

**2** Perforation holes in the outer shaft plus porous padding foames allow comforting air circulation.

**3** The toe top is made of soft, elastic rubber with a strong grip in order to fix the position of the boot in the kneeling position.

**4** Velcro closure to ensure a snug fit.

**5** The new system offers a pressure-free fixation of the foot without obstructing blood circulation. The two-piece, non-flexible nylon string makes a perfect fit, the padding prevents pressure build-up. Being an integral part of the shaft and furnished with an inner and

outer set of hooks this system provides a two-layer lacing.

The deeper hook which is connected to the Digafix-system improves also the sitting position of the heels.

**6** Toe- and heel-cap are made of extremely stiff thermoplastic material.

**7** The anti-skid profile of the rubber sole ensures a steady foot-hold.

**8** Grip control for a maximum support in kneeling position.

**9** Grip Control supports the hold while in kneeling position.

Available in sizes:  
From 35 to 49 (2 1/2 to 13).

**Art.-Nr.: 130**

Material: leather.  
Sole: India rubber.

# ahg-STENVAAG DESIGN „LADY“

high tech lady shooting boots

## ahg-SHOOTING BOOTS STENVAAG LADY:

Considering the anatomical differences of women's and men's feet we developed shooting boots especially for women which differ from the men's model in the following features:

Sole: India rubber.

17

# ahg-SHOOTING BOOTS „easy“

safety for every foot

Material: leather.  
Sole: India rubber.

## ahg-SHOOTING BOOTS „easy“:

- Top price shooting boots in the usual Meindl quality.
- Anatomically shaped inner sole.
- Optimum workmanship for stability.
- Stable, straight sole for safe standing.

Available in sizes:  
From 37 to 47 (3 1/2 to 12).

**Art.-Nr.: 132**

Accessories like shoe sole  
trees etc. see page 19.

18

# ahg-SHOOTING BOOTS

if you need reliable boots

## ahg-SHOOTING BOOTS:

Shooting boots newly designed according to the expectations of top shooters.

- Well padded tongues absorb pressure which might cause discomfort.
- The cut of the body allows lacing up to the tips and thus gives every foot a customized fit.
- The front leather toe cap is shaped to keep it from touching the floor when in the kneeling position.
- The extra firm anti-slip sole is also slightly concave on the inner side to provide an extra solid support for the standing position.
- The back edge of the sole is slightly slanting to improve seating in the kneeling position.
- The stability of the shank in combination with the solid leather cap gives firm support to the foot.
- Beautiful finish inside and outside gives the boots a sports fashion touch.
- The anatomically supportive inner sole prevents foot fatigue during competition.

Available in sizes:  
From 35 to 51 (2 1/2 to 15).

# ahg-SHOOTING GLOVES

as individual as your personality

All shooting gloves correspond to the ISSF + DSB-Rules.

ahg-shooting gloves of various colors and materials. The individual glove for each personality and taste, but all models of high quality.

- Optimum fit.
- Comfortable cut.
- Anti-slip padding or TOP GRIP.
- Made according to DSB and ISSF-rules.

20

## ahg-CONTACT: ▶

A new glove developed by ahg-Anschütz which offers more contact to the gunsupporting hand, much freedom of movement and maximum padding. Thumb and forefinger are open to allow comfortable loading of the gun.

We have used a special soft leather and a breathable fleece material for a good regulation of temperature and reduction of perspiration.

Palm and back of the glove are equipped with a newly developed hard-wearing antislip padding for proper adjustment to the hand and non-slip positioning of the gun.

If required, the glove can be washed at 30° C.  
Sizes: XS, S, M, L, XL, XXL.

For right hand shooters.

**Art.-Nr.: 118**

For left hand shooters.

**Art.-Nr.: 118-L**

Material:  
46% leather, 50% polaire polyester, 4% rubber.  
Padding: 60% polyamid, 40% polyurethan.

## ahg-THERMO STAR: ▶

5-finger glove.  
The latest generation of shooting gloves from ahg-Anschütz. It offers you the advantages which become evident during competition:

- With the net material at the back of the hand and on the palm and with air ventilation holes at the fingers an optimum temperature circulation is reached to avoid excessive heat in the glove.
- Due to the use of latest high-tech materials the back of the hand is reinforced, the wrist is stabilized in addition.
- There is a damping material from the back of the hand to the palm. The pressure of the handstop is thus evenly distributed in prone position.
- TOP GRIP material avoids any sliding of the gun.

Sizes: XS, S, M, L, XL.

For right hand shooters only.

**Art.-Nr.: 127**

Material: 6% leather, 60% rubber, 6% rubber band, 20% PU und 8% polyamid.  
Inner lining: 34% wool, 33% viscose and 33% polyacryl.  
Padding: Top Grip.

### ahg-AIR MAX: ▶

- 5-finger glove. The top model for top shooters:
- Vertical slot on the back of the glove for easy bending.
  - Mesh material on back and palm for good regulation of temperature.
  - Stretch band on the wrist.
  - TOP GRIP padding.
  - Corresponding to ISSF + DSB-rules.
  - Color combination: black/red/silver.

Sizes: XS, S, M, L, XL.

For right hand shooters only.

**Art.-Nr.: 107**

Material: 70% polyamid (mesh), 20% artificial leather (PVC; PES) and 10% leather.  
 Inner lining: 34% wool, 33% viscose and 33% polyacryl.  
 Padding: Top Grip.

### ahg-PRO-TECH: ▶

- 5-finger glove.  
 Top model of the ahg-Collection:
- Cross slot at the back for better bending capacity of the fingers.
  - Ventilation patterns on the side back of the hand guarantee best air circulation.
  - Stretch band on wrist.
  - GRIP padding.
  - According to ISSF + DSB-rules.
  - Color: black-turquoise.

Sizes: XS, S, M, L, XL.

For right hand shooters.

**Art.-Nr.: 125**

For left hand shooters.

**Art.-Nr.: 125-L**

Material: 60% leather und 40% artificial leather.  
 Inner lining: 34% wool, 33% viscose and 33% polyacryl.  
 Padding: India rubber.

### ahg-TRIGGER: ▶

5-finger glove.  
 A new glove developed by ahg-Anschütz especially for the trigger hand. The double fleece material ensures a comfortable and constant temperature of the hand. The forefinger is open for a direct contact to the trigger.  
 The special soft leather in the palm clings to the pistol grip of the gun and thus ensures a non-slide grip. If required, the glove can be washed at 30° C.

Sizes: XS, S, M, L, XL, XXL.

For right hand shooters.

**Art.-Nr.: 119**

For left hand shooters.

**Art.-Nr.: 119-L**

Material:  
 46% leather, 50% polaire polyester and 4% rubber.

# ahg-SHOOTING GLOVES

as individual as your personality

22

# ahg-SHOOTING CAPS etc.

high quality shooting caps

24

## ▲ NEOPREN CAP:

- Protection from scattering light.
- Flexible and light, thus comfortable to wear.
- Corresponds to ISSF + DSB-rules.

Material:  
100% PU.

**Art.-Nr.: 301**

## ▲ ahg-Headband SPORTLINE:

- With sun shield.
- With velcro strap for individual adjustment of the sun shield.
- Highly suitable for changing light conditions at the shooting range.

Material:  
92% polyester, 8% rubber.

**Art.-Nr.: 326**

## ▲ ahg-HEADBAND WITH EYESHIELD:

- With non-reflective and scratch-resistant eye-flap.
- Corresponds to ISSF + DSB-rules.

Material:  
92% polyester und 8% rubber.

**Art.-Nr.: 324**

Like Art. 324 but with the colors black, red and blue on white.

**Art.-Nr.: 316**

You can cut along the line.

The long badge on the ahg-shooting cap avoids negative effects of the disturbing light from above to the shooting process.

The integrated perspiration absorbing sweatband gives even more wearing comfort. The Velcro allows a snug fit to any head size. The side parts are made of a net material which allows air circulation and thus balances the temperature. The eye shield can be adjusted individually by Velcro. Simply flip the side flaps up and the cap corresponds to DSB and ISSF rules. If the shooter has to obey other rules which do allow side flaps, these can simply stay the way they are.

## ▲ ahg-SHOOTING CAP:

- Side flaps can be flipped up.
- The side parts are made of a net material which allows air circulation.

Material:  
60% cotton, 40% polyester.

Blue-black.

# ahg-SHOOTING SLINGS

non-extending. Also available for left **L** hand shooters

## ahg-SHOOTING SLINGS:

Optimum connection of the sling to the shooter's jacket is ensured by a slewable metal clip on the ahg sling into which the hook (Art. 336) of the ahg-shooting jacket engages. In this manner slipping of the sling is prevented.

- Pliable, no-stretch material guarantees constant sling length.
- Optimum connection to the shooter's jacket.
- Freely mobile metal catch is hooked to the shooting jacket.
- No slipping of the sling.

## ahg-SHOOTING SLING ► CONSTANT:

Leather.

**Art.-Nr.: 333** **L**

Synth. material, black.

**Art.-Nr.: 335** **L**

## ahg-SHOOTING SLING ► PROFESSIONAL:

With additional advantages such as the well-known and approved swivel metal clip.

- Variable adjustment of the arm loop.
- For right and left hand shooters.
- Narrow distance of holes for exact adjustment.

**Art.-Nr.: 330** **L** Leather.

**Art.-Nr.: 331** **L** Synth. material, black.

**Art.-Nr.: 332 B** Synth. material, blue.

## ahg-SHOOTING SLING ► SWING:

ahg-shooting sling SWING is the latest development of ahg-Anschütz. This is a sling with combined precise adjustment.

This sling offers the following advantages:

- Easy adjustment of length with one hand while staying in position.
  - Automatic axial adaption of the forepart of the sling to guarantee a permanent optimum application of force in position.
  - Sling fixing and sling are connected by a special persenning closure with which it is possible to couple and uncouple the sling quickly with one hand.
  - The arm sling with 4 times adjustable reception for the persenning closure guarantees an optimum sling position.
- In addition the arm sling can be individually adapted to the upper arm by a buckle.

- Special, non-extendable sling material with textile inlay guarantees optimum stability.

## ▲ ahg-SHOOTING SLING CLIP:

The ahg-shooting sling model CLIP has a new fine adjustment which allows a quick and simple adjustment of length.

## ahg-SAFETY LOOK FOR TRIGGERS: ▶

Protects your rifle from unauthorized use.  
 Suitable for all rifles.  
**Caution:**  
 Install only to an unloaded rifle.  
 Store your rifle in unloaded condition!

**Art.-Nr.: 711.7250**

## ahg-SAFETY ROD SIGNAL LINE: ▶

Recently, security regulations for shooting ranges have been enforced and now require that non-loaded barrels have to be marked.

pushed to the muzzle, then the end of the safety cord is pulled out of the muzzle. This is a clear sign that the sporting gun is not loaded.

Therefore, we have immediately developed the safety cord "signal line" usable for all calibres.

The safety cord is supplied in units of 1 m or 10 m for individual cutting.

**Art.-Nr.: 1400** 1 m.

**Art.-Nr.: 1401** 10 m.

# ahg-MUFFLERS

to keep things quiet

## ▲ ahg-ELECTRONIC MUFFLERS:

Optimum protection. Automatic sound insulation is actuated at props.

- Speech permeability.
- No hindrance while shooting.
- Extraordinary insulating properties.
- Variably adjustable.
- Folding ear cups with electronic device, insulation at over 83dB (shots etc.), for one battery.

**Art.-Nr.: 307**

## ▲ PELTOR-POCKET MUFFLERS:

The slim design of these hearing protectors makes them especially suitable for target shooters.

- Very light (approx. 180 g).
- Comfortable fit.
- Obstruction-free when positioning.
- Considerable sound insulation.
- Variably adjustable.

**Art.-Nr.: 313**

## ▲ ahg-POCKET MUFFLERS:

A special ahg product developed for the shooter with regard to sound dissipation.

- Very light (approx. 180 g).
- Foldable.
- Wide soft folding ear cups.
- Adjustable spring steel head band.
- Noise reduction rating 17 decibels.

**Art.-Nr.: 308**

## ◀ ahg-EAR PROTECTOR JELLY PLUG:

These jelly plugs will eliminate the shooting noise and enable better concentration on your competition.

They can be washed, they are connected with a cord for your neck and are supplied with a small box for storage.

**Art.-Nr.: 306**

## ▲ ahg-SPORTS GLASSES:

Stable sportsglasses protect your eyes and increase the contrast of the environment.

**Art.-Nr.: 1013** Grey.

**Art.-Nr.: 1014** Yellow.

## ▲ ahg-EAR PLUG CEASE FIRE:

This ear plug muffles every loud noise with a baffle inside the plug cartridge. At low levels of noise, the valve is open. Loud or impact noises cause the baffle to close, providing hearing protection. The ear plug can be washed and is supplied with a plastic box for safe storage.

**Art.-Nr.: 305**

# ahg-AMMUNITION BOX

a maximum of order for your ammunition.

# ahg-TRIPODS

solid helpers

36

## ahg-UNIVERSAL TRIPOD ▶ with Swivel Joint:

The ahg-universal tripod has a new center column that allows easy changing in every shooting position. The excenter nut continuously fastens the modules of the telescope bar. This tripod can be demounted easily.

The standing legs can be screwed into the basic-ball body in 2 different angles. The tripod thus adjusts to the individual circumstances on the shooting range.

The high-tech clamping mechanism in the aluminum head can compensate high forces. The special coated surface completes this product's stability and handiness. This ahg-universal tripod can be adjusted individually up to a height of 170 cm on the telescope.

The design of ahg-universal tripod allows accessories like the ahg-ammunition holder or the ahg-rifle holder to be mounted additionally.

Total weight: 1100 g.

**Art.-Nr.: 451**

451

451

NEW!

457

## ahg-RIFLE HOLDER TRIPOD „de luxe“:

The ahg-rifle holder tripod has all the advantages of the universal tripod with ammunition and rifle holder but without the swivel joint and the prone adapter screw.

**Art.-Nr.: 457**

## ahg-LOADING PAD: ▶

A competition shooting special: anti-gliss pad mounted on a rock-solid tripod. Shooters rest the rifle on the pad to ensure that shoulder set and cant angle remain steady while loading.

- Solid tripod.
- Anti-slip surface.
- Variably adjustable.
- Cartridge holder for air and small bore rifle ammunition.

**Art.-Nr.: 453**

NEW!

## ahg-SWIVEL JOINT: ◀

The technically lavish clamping mechanism inside the aluminum head is very durable. Especially layered surfaces complete the characteristics like stability and handiness. The swivel head has a connecting joint of 1/4" and 3/8".

**Art.-Nr.: 450**

## ahg-PRONE TRIPOD: ◀

- Prone position tripod.
- Steady tripod.
- Anti-glide leg tips.
- Easy fold-away.
- Lightweight (275 g).
- Swivel joint inclusive.

**Art.-Nr.: 454**

# ahg-SPOTTING SCOPES

for high quality spotting

37

▲  
**ahg-SOFT CASE**  
for SPOTTING SCOPE:

- For all ahg-spotting scopes.
- With carrying sling.
- With velcro closure.

**Art.-Nr.: 400**

▲  
**ahg-SPOTTING SCOPE**  
15-45 x 65:

- High quality spotting scope with 45° interchangeable eye piece.
- Rotating bracket for optimal angular adjustment of the scope.
- Water rejecting surface.
- Including camera adaptor.
- For all shooting positions until 100 m.

**Art.-Nr.: 444**

▲  
**ahg-SPOTTING SCOPE**  
20 x 50:

- High quality spotting scope with water rejecting surface and low weight (300 g).
- Excellent for all pistol shooters.
- Compact construction, 19 cm long, fits into every bag.
- With carrying bag.

**Art.-Nr.: 443**

▲  
**Hunting Binoculars**  
MONARCH:

- Overwhelming robustness and performance for the ambitious hunter.
- All lenses and prisms are multilayer coated.
- Phase correction coated roof prisms for high resolution.
- High-reflection mirror-coating prisms for bright image.
- High-eye point design provides a clear field of view, even for eyeglass wearers.
- Close focusing distance: 2.5 m.
- Waterproof (up to 2 m for 5 min) and fog-free with O-ring seals and nitrogen gas.
- Eco-glass optics free of lead and arsenic.
- Rubber armoring for shock resistance.
- Turn-and-slide rubber eyecup.
- 8 x 42.

**Art.-Nr.: BAA610AA**

▲  
**Telescopic Sight**  
MONARCH II:

For especially demanding hunters. These models have a tube diameter of 25.4 mm as well as flat adjustment towers which allow a quick and precise fine-tuning by hand.

- 3,5-10 X 50.
- Black matte.
- Illuminate Mildot.

**Art.-Nr.: BRA10907**

- 5,5-16,5 x 44 AO.

# ahg-IRIS FRONT SIGHT

38

## ahg-DUO-IRIS FRONT SIGHT:

Inner and outer diameter step-lessly adjustable to meet varying light conditions and target sizes.

- The extraordinarily wide adjustment range makes the Duo Iris Front Sight a perfect choice for all shooting disciplines.
- Available with cross hair ring (9750, 9751, 9752, 9752F), with the option to switch to lateral hair for air gun competitions.
- Also available as glass ring version (9760, 9761, 9762, 9762F).

## ahg-SUPER-IRIS GLASS FRONT SIGHT:

- Just like front sight 9740 this Super-Iris-Glass Front Sight features an extremely wide adjustment range, based on the double-pronged aperture design.
- Easy fitting of sight into the front tunnel.
- Stepless adjustment.

## ahg-GLASS APERTURE SQUARE:

- Adjustable aperture with a polished glass carrier and a squared external contour. Ideal for bench rest shooters.

## ahg-VARIO SWING FRONT SIGHT:

The first aperture worldwide that allows canting at any time without any tool and within a few seconds.

The sight is screwed into the front tunnel and secured with a lock nut. To correct for canting simply adjust the scale on the housing. Several scale values may be marked and thus quickly recovered after a change of positions.

With a tool you can change the VARIO SWING FRONT SIGHT from lateral- to cross hair like art. 9740.

## ahg-APERTURE VARIO SQUARE:

Based on the Vario-Swing we have developed a square with an external contour that can be adjusted to the individual tilted angle without tools.

### ahg-VARIO SWING FRONT SIGHT:

Ø	M18 x 0,5	M22 x 0,5	Type

2.5 - 5.0		<b>Art.-Nr.: 9526</b>	
1.8 - 4.3	<b>Art.-Nr.: 9524</b>		

## ahg-GLASS FRONT SIGHT HIGH END:

The sight ring is embedded in a ground-glass pane, thus completely distortion-free.

A strong contrast is created with the combination of glass and mat-black aperture. The use of glass and metal materials avoids variations in temperature, thus this front sight is especially suitable for big bore rifles.

- Optically perfect mat-black metal aperture set into a securely fixed glass holder.
- Distortion-free.
- Reflection-free front sight insert.
- Optimal contrast.
- Heat-resistant material.
- Easy substitution of front sight.
- Ideally suited for large-bore rifles.
- Easily adjustable to meet individual requirements.

For M18 x 0,5.

**Art.-Nr.: 9507**

For M22 x 0,5.

**Art.-Nr.: 9508**

Available diameters:  
Ø 3.0 - 5.0 in 0.1 mm steps  
with an aperture width of 1.2 mm.

## ahg-HIGH END SQUARE:

A product especially developed for Benchrest shooters. For older shooters it is sometimes a problem that the vision of the individual insert of a front sight becomes blurred or that they cannot see the complete 360° circle.

A square with a hole seems to be the only alternative to the common front sight that makes sense. Thus the round mirror is still centered with a round hole. Horizontal and vertical cants of the square may be used as a check against canting.

**Art.-Nr.: 9511** M18.

**Art.-Nr.: 9512** M22.

Available diameters:  
3.0 - 5.0 in steps of 0.1 mm.

# ahg-IRIS FRONT SIGHT

40

## ahg-FRONT SIGHT SWING:

This new front sight can be turned around its axle without any tools.

- Crimped clamp-ring for cross-level adjustment.
- Easy removal of the cross levels.
- Markers on the canting scale allow quick and precise recovery of settings for different shooting positions.

- Absolutely symmetrical build ensures clean target image.
- Further enhanced by a stub between tunnel and dovetail, which may be used for additional canting control.

## ahg-FRONT SIGHT STRONG:

The new ahg-front sight STRONG has the following characteristics:

- Milled from full material, therefore especially strong.
- Special lateral clearing for easy handling of the steel aperture, at the same time the size of the aperture is visible (front sight for M 22 has no lateral clearing).
- New sturdy clamping device, especially suitable for 300 m, long range and crossbow.
- Suitable for models 1407 - 1813 (replacement for ANSCHÜTZ front sight Art. 6523).

Top price

▲ STRASSER-EYE SHIELD BIG:

**Art.-Nr.: 9500** Black.

**Art.-Nr.: 9501** White.

To relax the aiming eye. This shield can be used for right or left hand shooters.

▲ STRASSER-EYE SHIELD SMALL:

The ahg-eye shield is simply being attached to the existing iris or sight disc. Strasser small corresponds to the latest DSB and ISSF rules.

**Art.-Nr.: 9499** Transparent.

**Art.-Nr.: 9498** White.

NEW!

NEW!

▲ ahg-COVERING DISCS for PLASTIC SHIELDS:

These ahg-covering discs are simply being attached to the existing rubber eyeshade (ahg 9700 or JGA 6700-20) which have a diameter of 27 mm. These 2 plastic discs (black and transparent) can be swung out individually to cover the non-aiming eye.

**Art.-Nr.: 9496**

▲ ahg-EYESHADE incl. 2 Discs to Cover the Non-Aiming Eye:

The ahg-universal eyeshade is simply attached to the existing iris disc or rear sight disc. Two plastic discs, transparent and black, (supplied) can be swung out in order to cover the non-aiming eye. This relaxes the aiming eye. This shield can be used by left or right hand shooters.

**Art.-Nr.: 9497**

NEW!

▲ ahg-EYE SHIELD:

For iris.  
- Made of Sikolex or Lexan.  
- To be attached to the rear iris to cover the non-aiming eye.

**Art.-Nr.: 9776-1** White.

**Art.-Nr.: 9776-2** Transparent.

ahg-Rear Sight SIGHT BASE „10-50“:

Rear sight for 10, 50 and 100 metres. Polished fine treaded spindles made from stainless steel, equipped with ball bearings guarantee absolute precision. This SIGHT BASE gives the shooter the advantage to still observe the environment e. g. wind condition. The shooter still has an overall view while taking aim. When shooting outdoors it allows also a better observation of the weather.

1 click on 10 m corresponds to 0,25 mm, 1 click on 50 m to 1,22 mm.

This sight base has a total weight of 200 g.

**Art.-Nr.: 9805**

NEW!

# ahg-IRIS DISCS

for comfortable sighting

## ahg-IRIS DISCS:

The main feature is an interchangeable color ring. The available colors were developed in close co-operation with opticians to prevent the eye from quick fatigue during competitions. According to the light conditions the contrast at the eye can be adapted by changing the aperture.

The design of the iris is a further advantage. It is based on more than 30 years of experience in the field of lamella construction. The shape of the lamella was optimized by computer simulation.

Modern production techniques made it possible to increase the number of lamellas to the incredible amount of **15 individual segments**. Only with this feature an absolutely round iris can be obtained which is of utmost importance for the shooter. The iris can now be adjusted from **0.5 to 3.0 mm**. This adjustment can easily be carried out during shooting by a simple linear movement of the lamellas.

### Reflexion

If beams of light coming from the air meet glass or if they come from glass and meet the air beams are reflected which do not reach the eye anymore and thus deteriorate the target picture.

For this reason ahg products are equipped with surfaces reduced in their reflecting capacity.

With ahg polarisation filter.

Without ahg polarisation filter.

ahg-iris with color filter Art.-No.: 9779 consists of the new contrast increasing color filter C 41 blue.

## ahg-IRIS DISC TWIN with 10 filters:

For indoor and outdoor shooting. Filter colors: light grey, grey, darkgrey, C 41 blue, C 41 UV, yellow, green, orange, brown, C 41 peach.

- Improved handling by new filter ring.
- Adjusting range 0.8 to 1.8 mm.
- 15 Lamella segments.

## ahg-IRIS DISC TWIN with 10 color filters and full polarisation:

Like 9786 but with integrated polarisation filter.

- Improved handling by new filter ring.
- Adjusting range 0.8 to 1.8 mm.
- 15 Lamella segments.

Art.-Nr.: 9787-O

Art.-Nr.: 9787-S

9787-O

9787-S

## Good adjustment... means good sighting!

The variably adjustable iris disc grants an optimum focussing control. Focus change can be watched while turning the iris.

The best results are achieved from 1.0 to 2.0. If the shooter's eye is far away from the sight, e.g. in prone position, more than 2.0 might be useful. Under 1.0 you think that the peep picture is not sharp, not round but angular or dusty. This physical effect is due to the small diameter. When checking the iris at its smallest diameter with the help of a magnifying glass, you will see that the peep is perfectly round. This extremely small diameter is rarely used.

Very dark.  
Blurred target picture.

Best target picture.  
Optimum adjustment possible.

Large iris diameter.  
Long distance from peepsight to eye.

43

# ahg-IRIS DISCS

with removable color ring

## ahg-IRIS DISCS:

All ahg-iris discs produced from 1999 on have a color ring which can be unscrewed and replaced by rings of other colors (Art.-Nr.: 9782/9783).

These colored rings will enable you to react promptly to any change of light conditions in the shooting range in order to obtain a more balanced target and a better contrast.

A light color ring, for example, will have a positive effect on the target at a dark shooting range.

44

9775-S

9779-S

## ▲ ahg-IRIS DISCS:

- Eyepiece with substitute color ring SMALL.
- Adjusting range 0.5 - 3.0 mm.
- 15 lamella segments
- Extra short.

**Art.-Nr.: 9775-O**

**Art.-Nr.: 9775-S**

## ▲ ahg-IRIS DISCS:

A combination of the ahg-iris aperture 9775 with 5 glass filters of the colors light grey, dark grey, orange, yellow, C 41 blue.

- Eyepiece with substitute color ring SMALL.
- Adjusting range 0.5 - 3.0 mm.
- 15 lamella segments.

**Art.-Nr.: 9779-O**

**Art.-Nr.: 9779-S**

9781-S

## ▲ ahg-IRIS DISCS

With 5-color filter and full polarisation:

- Eyepiece with color ring SMALL.
- Adjustment range 0.5 - 3.0 mm.

Color filters:

- Light grey, dark grey, orange, yellow, C 41 blue.

Polarisation:

- Two independently adjustable pol-filters.
- Incremental dimming.
- Separate adjustment for polarisation and dimming.
- Filters may be swung aside giving a direct target view.
- Also available with (S) black eye piece.

**Art.-Nr.: 9781-O**

**Art.-Nr.: 9781-S**

## ▲ ahg-IRIS DISCS:

With polarisation filter.

- Eyepiece with substitute color ring SMALL.
- Adjusting range 0.5 - 3.0 mm.
- 2 individually adjustable polarisation filters.
- Variably adjustable regulation of brightness.
- Blacking out and polarisation can be set independently.
- Both discs can be put in off-position for free peep.

**Art.-Nr.: 9780-S**

## ▲ For BUSK/SAUER Rear Sight:

ahg-IRIS with 5-color filter:

**Art.-Nr.: 9779-A/O**

ahg-IRIS APERTURE:

**Art.-Nr.: 9775-A/S**

If you need irises or apertures with another size of thread please do not hesitate to contact us!

45

**ahg-HAWK 4,5 OPTICAL ADAPTER:**

To see like a hawk, who doesn't want that?

The HAWK 4,5 is an optical adapter which facilitates an upgrading of every CENTRA-iris disc.

This adapter magnifies by 1,5 and facilitates an equalization of the rear sight from -4,5 to +4,5. In some cases this adapter can replace glasses.

**Art.-Nr.: 9580**

**ahg-IRIS:**

- Variably adjustable from 0.8 - 2.2 mm.
- The peep picture is 100% round.
- For all current rear sights.

**Art.-Nr.: 9510**

**ahg-IRIS:**

- With 5-color filter.
- Yellow, green, brown, grey, light grey.
- Increased contrast of target picture.
- If no filter is necessary this iris can be adjusted to free peep picture.

**Art.-Nr.: 9560**

**ahg-IRIS:**

- With full polarisation.
- Variable adjustment of brightness.
- Filter reduces disturbing reflexion.
- It is possible to use this iris with free peep picture.

**Art.-Nr.: 9550**

**ahg-IRIS:**

- With 5-color filter and full polarisation.
- Individual adjustment of the optical device to the light conditions.
- Polarisation and dimming can be adjusted separately thanks to two polarisation discs.
- A free peep picture is also possible if the weather situation is bad.

**Art.-Nr.: 9565**

**ahg-IRISBLENDE:**

- With optical device.
- Magnifies 1.5x, ranges from -3.5 to +3.5 D.
- Adjustment range 0.8 to 2.2 mm.
- Perfectly circular target image.
- Fits current rear sight models.
- Overall size: extra short.

**Art.-Nr.: 9530**

**ahg-IRIS:**

- With 5-color filter and optical device.
- Like Art. 9560, but with optical device.

**Art.-Nr.: 9570**

**ahg-ADAPTER:**

For irises with optical device: (Art. 9530, 9570, 9575, 9551), to be used also without optical device.

**Art.-Nr.: 9577**

**ahg-IRIS:**

- With full polarisation and optical device.
- Like Art. 9550, but with optical device.

**Art.-Nr.: 9551**

**ahg-IRIS:**

- With 5-color filter, optical device and full polarisation.
- Reliably compensates varying light conditions.
- Separate setting of polarisation and dimming.
- In case of suboptimal lighting conditions filters may be disengaged.

**Art.-Nr.: 9575**

**ahg-OPTICAL ADAPTER:**

- Magnification 1.5
- Adjustable from -4.5 to +4.5 diopter.

**Art.-Nr.: 9578**

Only to be used for Art.-No: 9530, 9570, 9575 and 9551.

# ahg-ACCESSORIES

for better aiming

## ahg-SIGHT-TRACK BASE: ▶

This new base has the following advantages:

- Long sight tunnel prevents from disturbing light.
- Bridging of the loading platform stabilises the receiver, thus the vibrations of the shot are reduced.
- Additional weight above the axle of the barrel in front of the normal sight.
- Top Design in connection with increase in value of your rifle.
- Approx. 20 mm more for more possibilities to mount your sight set.
- Better recognizing of aiming and canting faults due to longer front sight tube.

Also available as a complete rear sight with 10 or 20 click.

With 10 click.

**Art.-Nr.: 9797-U1**

With 20 click.

**Art.-Nr.: 9797-U2**

Sight-Track-Base.

**Art.-Nr.: 9797-U3**

Sight-Track-Base.

## ahg-HANDSTOP INTEGRAL: ▶

You need the right equipment for a successful competition.

The ergonomically designed ahg-hand-stop INTEGRAL will make a contribution to this goal and help you to perform beautifully.

This handstop is adjustable in all directions (horizontally, vertically and radial) and thus can distribute the high power that is transmitted from your shooting sling to your hand.

Precise shooting is possible when you are not distracted by an aching hand.

**Art.-Nr.: 6229**

## ahg-BARREL WEIGHT STABILISATOR: ▶

This stabilizer reduces the recoil movement of your rifle. With the help of the weights you may tune the lever power individually in axial, vertical and horizontal direction.

When the enclosed two steel supports are screwed to the stabilizer, it may be used as bipod.

**Art.-Nr.: 8020**

### ▲ ahg-SPIRIT LEVEL:

Can be used to control canting without having to turn the head. It is attached to the rail of the action in front of the rear sight.

- Knurled nut ensures easy and variable adjustment.
- Easy centering of the front sight because the spirit level is not visible in the target picture.

**Art.-Nr.: 9506**

### ▲ ahg-SPIRIT LEVEL:

- Two sizes M18 and M22.
- Adjustment without tools.
- Exact reproduction of various canting angles.

For M18 front sight.

**Art.-Nr.: 9503**

For M22 front sight.

**Art.-Nr.: 9504**

### ▲ ahg-BARREL WEIGHT:

- Weight: 200 g.
- For diameter 20 - 22,5 mm. e.g. for Anschütz Mod. 1407 - 1907, 2001 - 2002.
- Felt stripes avoid scratches.

**Art.-Nr.: 8007**

47

# ahg-ACCESSORIES

best quality for professionals

48

## ▲ ahg-REAR SIGHT KNOB-SET:

In various colors.  
- For ANSCHÜTZ rear sight 6805 / 7002.

**Art.-Nr.: 4806-2** Lilac.

**Art.-Nr.: 4806-3** Blue.

**Art.-Nr.: 4806-4** Red.

## ▲ ahg-ALUMINIUM BALLS:

For the bolt handle.

**Art.-Nr.: 4804-1** Gold.

**Art.-Nr.: 4804-2** Lilac.

**Art.-Nr.: 4804-3** Blue.

**Art.-Nr.: 4804-4** Red.

**Art.-Nr.: 4804-5** Green.

**Art.-Nr.: 4804-6** Silver.

## ▲ ahg-HIGH SIGHT BLOCK TRACK:

- Variable lateral adjustment.  
- Elevation 9 mm.

For Anschütz rifles.

**Art.-Nr.: 6924**

For FWB rifles.

**Art.-Nr.: 6925**

## ▲ ahg-HIGH SIGHT BLOCK:

- 100 % tight.  
- For ANSCHÜTZ Mod. 1903 - 2013.  
- Height only 4 mm.

**Art.-Nr.: 6923**

## ▲ ahg-BOLT HANDLE-DESIGN:

To screw on the bolt handle.

**Art.-Nr.: 4805-2** Lilac.

**Art.-Nr.: 4805-3** Blue.

**Art.-Nr.: 4805-4** Red.

## ◀ ahg-UNIVERSAL-CARRIER:

- Suitable for all Anschütz stocks starting from model series 1413 - 2013 (fix version).  
- Individual adaptation of the carrier, axially, horizontally and vertically adjustable.  
- Suitable for all common aluminium, rubber and hook butt plates.

**Art.-Nr.: 9796**

## ahg-CHEEK PIECE MECHANISM / BENCH REST SHOOTING:

Especially while bench rest shooting, the sturdy and continuously adjustable (towards the back, up to 13 cm) mechanism is being mounted to the original Anschütz cheek piece adjustment (2213-8200) in order to optimize positioning.

The continuous adjustment enables the shooter to find the optimal head position. The reverse adjustable cheek piece therefore offers sturdy, repeatable positioning; a relief for neck muscles.

Any previous functions of the cheek piece adjustments are not influenced and can be used as usual.

Suitable for all Anschütz rifles which are equipped with the cheek piece adjustment 2213-8200.

**Art.-Nr.: 1025**

**NEW!**

**NEW!**

## ahg-EYE II:

Variable Sight Carrier.

This new carrier allows aiming with the left eye for right hand shooters, or vice versa. Perfect position and distance to the eyes by adjustable windage and rotating carriers for rear and front sight. Mounting and demounting of the front sight carrier for transportation of the weapon is very easy as a center-ring fastens the exact position of the carrier.

When ordering, the diameter of the barrel has to be stated, as the front sight carrier is being adjusted to that barrel. Total weight: 245 g.

**Art.-Nr.: 6927**

49

## ahg-REAR SIGHT RAIL TELE:

To move the rear sight back for benchrest shooting.

For Anschütz rifles.

**Art.-Nr.: 1003**

For FWB rifles.

**Art.-Nr.: 1004**

## ahg-WEDGE FOR ANSCHÜTZ ALU STOCK:

Small bore rifles.

This ahg-fore-end wedge can be easily attached just by sliding on to the Anschütz small bore rifle alu-stocks.

By shifting your hand (back and forth) you may change your position individually, thus enabling you to react quickly and

efficiently to the conditions in your shooting range. Especially advantageous for shooters with short arms.

Weight: 350 g.

**Art.-Nr.: 1021**

## ahg-WEDGE:

- For Anschütz and FWB air rifles.  
- To be inserted into aluminium rail and tightened.

**Art.-Nr.: 1005** Hardwood.

**Art.-Nr.: 1006** Hardwood black.

## ahg-WEDGE:

For Anschütz air rifle alu-stocks Mod. 2002.

**Art.-Nr.: 1009** Hardwood black.

**NEW!**

## ahg-FOREEND RAISER BLOCK:

For aluminium-stock 2213/2313. ahg-Anschütz has developed a forend raiser block which can be fixed to the alu-stock 2213 or 2313. Just put it into the alu-rail and get fixed with 4 screws.

**Art.-Nr.: 1022**

# ahg-ACCESSORIES

best quality for professionals

50

## ▲ ahg-HANDSTOP:

With sling swivel.  
- Push button disengages swivel which remains on the sling.

**Art.-Nr.: 6225**

## ▲ ahg-HANDSTOP:

With detachable sling loop.  
- Suitable for:  
Anschütz, Diana, Feinwerkbau, Steyr.

**Art.-Nr.: 6226-1**

## ▲ ahg-HANDSTOP:

Version like Art. 6226-1 in different colors.

**Art.-Nr.: 6226-2** Lilac.

**Art.-Nr.: 6226-3** Blue.

**Art.-Nr.: 6226-4** Orange.

**NEW!**

## ▲ ahg-PALM REST:

A proven and tested, individually adjustable palm rest for standing position. The support raises the palm rest for an additional 25 mm at the maximum. The strong swivel joint with four screws allows combined adjustments of the palm

rest on three axes, thus enabling an optimal transmission of power to the supporting hand. The supporting surface is additionally coated on both sides with a profiled anti-slide rubber.

**Art.-Nr.: 9795**

**NEW!**

## ▲ ahg-BI-POD:

The BI-POD ensures a safe standing of the weapon when prone shooting. Using anti-slide rubber balls, the weapon has a secure position. Both supports can be folded together for transportation.

**Art.-Nr.: 9793**

## ahg-MONOFRAME: ▶

For 25 mm Spectacle Lens.  
Your individual, improved spectacle lens is put in the ahg-monoframe.  
With the help of a set adapter and a clamp, the ahg-monoframe is mounted centrally in front of the sight disc or the iris disc. Therefore, your sight defect is corrected directly on the iris disc, consequently aiming mistakes are avoided to a large extend.  
Only spectacle lenses with an outer diameter of 24 mm can be used.  
ahg-monoframe does not correspond to the presently valid rules of DSB and ISSF but can be used in many other disciplines.

**Art.-Nr.: 9450**

**NEW!**

**ahg-SPECIAL-TRIGGER SHOE:**

- Constant finger position.
- Absolute stability of trigger weight.
- Extremely quick shot release.
- Short trigger travel.
- Reduced force for first stage pull.

Suitable for FWB and Hämmerli.  
**Art.-Nr.: 9715**

Suitable for Anschütz 1907 - 2013 with trigger blade.  
**Art.-Nr.: 9716**

**ahg-TRIGGER SHOE:**

For Anschütz triggers 5018/5071.

- Variable height adjustment.
- 360° rotating trigger ball.
- Variable length adjustment of trigger blade. (better "forward" adjustment than the original trigger blade).

**Art.-Nr.: 9717**

**ahg-SIGHT RAISER BLOCK XXL:**

New shooting comfort will be experienced with this sight raiser block XXL (20 mm) which offers many advantages in standing and kneeling positions. The contortion of the head when aiming is reduced to a minimum, thus avoiding any tension in the neck and in the back. Use of this raiser block is permitted for all air and small bore rifle disciplines.

For Anschütz rifle Mod. 1903-9003.  
**Art.-Nr.: 6922**

For FWB rifle.  
**Art.-Nr.: 6921**

For Walther rifle.  
**Art.-Nr.: 6920**

**ahg-STOCK WEIGHT:**

The weight will be inserted in the groove of the stock and fixed with two screws.

- For Anschütz model 2002 Compressed Air Alu.
- Approx. 190 g.
- With individual engraving of the name.

Weight with engraving.  
**Art.-Nr.: 8009**

Weight without engraving.  
**Art.-Nr.: 8010**

**ahg-SIGHT RAISER BLOCK TRACK MAX:**

Facilitates horizontal (left - right) adjustments of approx. 20 mm. Additional vertical (high - low) adjustments by means of spacers - minimum 22 mm to maximum 27 mm. These individual adjustments allow an even more perfect adjustment of the sights, especially in prone or kneeling position. Tensions in the neck or back muscles can almost be avoided completely with such a perfect adjustment. The vertical adjustments can be mounted step by step in 1 mm clicks.

The sight set contains:  
4 cylinder screws each M3 x 18 and M3 x 20.  
4 distance discs each 4 mm, 2 mm and 1 mm in thickness.

Available for Anschütz rifles.  
**Art.-Nr.: 6926**

# ahg-ACCESSORIES

▲  
**ahg-TRIGGER PRESSURE GAUGE:**

- High precision gauge for measuring trigger weight.
- Equipped with weight indicator for easy reading-off trigger weight.

Trigger pressure gauge range:  
gauge:

**Art.-Nr.: 540** 5 - 50g.

**Art.-Nr.: 541** 25 - 250g.

**Art.-Nr.: 542** 50 - 500g.

**Art.-Nr.: 543** 200 - 2000g.

▲  
**ahg-UNI TOOL:**

With all common hex keys and one screw driver for all adjustments at the rifle.

- Hex key SW2, SW3, SW4 and one screw driver.

**Art.-Nr.: 1200**

▲  
**ahg-TRIGGER PRESSURE GAUGE:**

- Consisting of 4 parts. Air pistol 500 g, standard pistol 1000 g and target pistol 1360 g can be checked with one gauge.
- Shock absorbing suspension coil.
- Incl. 140 g extra weight and wooden case.

**Art.-Nr.: 545**

▲  
**ahg-FLIP-UP BLINDER WITH IRIS:**

- Flip-up blinder.
- Variably adjustable iris.
- Rubberized clip for safe and non-slipping clamping to all current glasses.

**Art.-Nr.: 9778**

◀ **ahg-VELOCIMETER:**

- For air rifles and pistols.
- Ideal for coaches to measure the speed of the air rifle.

**Art.-Nr.: 547**

▲  
**ahg-TORQUE WRENCH:**

- New design helps to tighten the stock screws of target rifles in order to grant a constant torque.
- Adjusting range from 4 - 12 Nm.

**Art.-Nr.: 4506-SW4**

Extra insert SW4:

**Art.-Nr.: 4505-1**

▲  
**ahg-TORQUE WRENCH:**

- Like Art. 4506-SW4, but with insert of size SW5.
- For big bore rifles such as Sauer.

**Art.-Nr.: 4506-SW5**

Extra insert SW5:

**Art.-Nr.: 4505-2**

▲  
**ahg-ABDECKSCHEIBE:**

- Flip-up blinder for the non-aiming eye.
- With rubberized clip for safe and non-slipping clamping to all current glasses.

Transparent.

**Art.-Nr.: 9777-2**

# ahg-SHOOTING GLASSES Jäggi Nova

helpers for your eyes

Practical design, simple handling and extraordinary solidity are the main features of these successful ahg-shooting glasses.

## JÄGGI NOVA SHOOTING GLASSES

come up to these expectations. A wide range of accessories ensures optimum conditions for all shooters even with strong visual defects and under extreme light conditions at the range. The glasses can be used for rifle and pistol shooting and shooting with open sight. Only change the lens frame - this can be done quickly and easily without any tools. The square-headed guide of frame and bows prevent the lens frame from unintentional movement or adjustment while shooting.

Supplied in a small handy case.

For rifles, with lens frame 42 mm.  
**Art.-Nr.: 9000-42**

For rifles, with lens frame 25 mm.  
**Art.-Nr.: 9000-25**

For pistols, with lens frame 42 mm.  
**Art.-Nr.: 9002-42**

Laser scaling on frame, lens frame and nose piece facilitate adjustments remarkably.

All detachable color filters are simply being clipped on to the lens frame and available in sizes 25, 31 and 42 mm.

	25 mm.	31 mm.	42 mm.

- Safety-Box for pellet cans. To avoid the problem of having to handle the adhesive strips on the cans. Simply put the can in the safety box.

Art.-Nr.: 2101

## ahg-PIN:

- With butterfly closure.
- Diameter 15 mm.
- Soft-enamel, iron punched.
- With ahg-Anschütz motive.

Art.-Nr.: 2001

## RIFLE-PIN 2313:

- Length 56 mm.
- With butterfly-closure.

Art.-Nr.: 2005

## RIFLE-PIN 1912:

- Length 56 mm.
- With butterfly-closure.

Art.-Nr.: 2002

## ahg-PELLET-BOX:

- To store your pellets.
- Easy handling.
- Suitable for cal. 4.5 mm (.177).
- For 100 pieces of Diabolo pellets.

Art.-Nr.: 1001

## ahg-MATCH DIABOLOS:

- Target pellets for air rifle and air pistol, made by H&N.
- Available in sizes 4.5 mm.
- For air rifle and pistol, Box with 500 pellets.

Art.-Nr.: 2102

## ahg-FINALE MATCH DIABOLOS:

- Final target pellets for air rifle and air pistol, made by H&N.
- Available in sizes 4.48 / 4.49 and 4.5 mm.
- For air rifle and pistol.
- Box with 500 pellets.

Art.-Nr.: 2100

## ahg-TIEBAR:

- Length 66 mm.
- Rifle Modell 2313.

Art.-Nr.: 2006

## ahg-KEY PENDANT RIFLE:

- Key pendant with rifle Mod. 1912.
- Elegant design.
- In new 3 D stamp technique.
- With ring.

Art.-Nr.: 2003

## ahg-PROTECTION WRAPPING for Compressed Air Cartridges:

- This protection wrapping can be adjusted from 35,5 to 57 length cm and protects the cartridge against damage, dust and moisture. Therefore, valves and threads remain protected. Suitable for Anschütz, FWB, Walther and other cartridges up to a diameter of 33,5 cm.

## ahg-BACK-PACK:

- A fashionable back pack for the transportation of all your equipment. On the side it has 2 elastic mesh for holding bottles. A pocket on the front has room for writing materials.

Dimensions:  
38 x 28 x 14 cm.

Art.-Nr.: 293

## ahg-SHOOTING BAG with wheels: ▶

The ahg-shooting bag with wheels accommodates all the necessary shooting equipment for the need of a travelling shooter.

- Sufficient space for jacket, pants, boots, scope, glove and many other things.
- Robust construction of the bottom (5 mm wood).
- 2 wheels in combination with belts for a lot of different transportation possibilities.

- Pull-out grip for easy pulling.

Dimensions:  
70 x 40 x 33 cm.

**Art.-Nr.: 290**

## ahg-SPORT BIG: ▶

The ahg-sport bag is opened up in the middle. One side can be locked by zipper, here you may store your jacket and pants lengthwise, both will thus last longer. The other side is divided in three compartments, each one can be locked by zipper.

You will see that it is no longer necessary to rummage your bag for the things you are looking for. Small compartments on one side of the bag may be used for targets, portfolios etc. The bag has skate-board rolls and an extensible frame grip for easy pulling.

Measurements:  
80 x 40 x 34 cm.

**Art.-Nr.: 292**

## ahg-ACCESSORY BAG: ▶

For sight sets and hook butt plates.

Developed for safe storage of accessories such as sights and butt plates. The padding of the bag protects accessories and prevents them from slipping. The bag will fit perfectly into the side pocket of our Sport Bag art. 292.

Measurements:  
22 x 22 x 10 cm.

**Art.-Nr.: 295**

## ahg-HUNTER'S BAG: ▶

Big travel bag for hunters and shooters with extra compartment for the weapon case and many additional compartments. A bag suitable for everything, especially for travels by plane. With telescope handle and large wheels.

Measurements:  
91 x 42 x 38 cm.

**Art.-Nr.: 294**

# MEC ACCESSORIES

best quality - from professionals for professionals

▲ MEC „TUBE“:  
Sighting line extension for  
air rifles:

- Extends the sighting line to the maximum.
- Variably adjustable sighting line.
- Variations of weight and balance.
- Reduction of recoil.

MEC TUBE  
for Anschütz air rifles.

**Art.-Nr.: 9900**

MEC TUBE for FWB.

**Art.-Nr.: 9901**

MEC TUBE for Walther.

**Art.-Nr.: 9902**

▲ MEC „CONTACT III“:

- Aluminium butt plate.
- Variably adjustable to any position.
  - Very good adhesion.
  - Suitable for all common air rifles.

**Art.-Nr.: 9903**

▲ MEC „VISOR“:

- Visor made of neoprene.
- Low weight visor against scattered light.
  - Can be shaped as desired.

Material: 100% PU.

**Art.-Nr.: 9905**

▲ MEC „TRIGGER“:

- Trigger Shoe
- Can be tilted to the side.
  - Tongue can be moved freely.
  - Horizontal grooves for better adhesion.
  - Optimum width.
  - Variable rings for height adjustment.
  - Light alu construction for function and stable fixing.

Trigger shoe for Anschütz.

**Art.-Nr.: 9906**

Trigger shoe for FWB.

**Art.-Nr.: 9907**

▲ MEC HANDSTOP:

- Can be moved to the side, i.e. the hand can individually be positioned at the stock.
- Variable height; according to the referring anatomy of the hand the height can be adjusted with the help of spacers.
- The special shape minimizes pain.
- Two possibilities to fix the sling. It is thus possible to have the sling pull from the center (sling is fixed in the screw) or the sling pull does not come from the center as the hand stop has been moved to the side.
- Scales for the movement to the sides.

**Art.-Nr.: 6227**

the new rifle for new challenges

57

## ahg-F27A CHALLENGER:

This highly accurate small bore target rifle has been developed in close cooperation with experienced target shooters and the knowledge resulting from it. The use of high quality material combined with solid and tried and tested technology offers the precision necessary to be successful not only to top class shooters.

- The centred locking mechanism of the straight pull action with the receiver offer an optimum absorption of the force created at shot release.
- Thumbhole stock adjustable in length, non-stained, with versatile butt plate and cheek piece adjustments as well as a flat forend raiser lock 4856 and individually adjustable hook butt plate.

- The well-known Anschutz hook butt plate 2213-8700 completes both stock variations of the model F27A Challenger at an optimum. It is possible to adjust the hook butt plate horizontally, vertically and radially very quickly. In addition, the weight distribution can be optimised individually by the new ahg-stabilizer for both stock variations.

# ANSCHÜTZ TARGET RIFLES

for real champions

58

## ▲ MODEL 9003 PREMIUM COMPRESSED AIR:

The world's best shooters contributed to the development of the new ANSCHÜTZ Match Air Rifle 9003 Premium.

- Tension free connection and vibration damping fixing of the barreled action in the aluminium stock through Soft Link, shock absorber pads.
- Absolutely maintenance-free stabilizer.
- Ultra-short lock time.
- New and innovative safety concept for the loading process.
- Dry-firing device.
- Adjustable forend.
- Complete PRO-Grip equipment.
- Patented butt plate and cheek piece adjustment.
- Patented air filter against pollution.
- Various stock decoration stickers to choose from.

## ▲ MODEL 8002 COMPRESSED AIR Alu PRO-Grip:

This new compressed air rifle corresponds to all modern requirements of today's competition air rifles and the latest state of technological development:

- The barreled action is embedded into the alu stock via vibration absorbing elastomers; vibrations which occur during shooting in the barreled action of the air rifle are thus effectively absorbed.
- The very fast lock time of the 2002 Compressed Air has been reduced again considerably
- The newly developed trigger unit offers a constantly reliable trigger service even during fluctuations in temperature.
- The barreled action is only cocked when

the action is closed completely; if the cocking lever is not closed completely, it jumps back automatically and a shot release is not possible.

- The dry firing mode can only be actuated in cocked condition; it is therefore not possible to un-cock the barreled action by pushing the dry firing switch once the trigger has been released, thus, an accidental shot release is avoided.
- Air filters protect pressure regulator and valve from impurities and thus avoid malfunctions.
- Grip, cheek piece and fore-end stock are made of PRO-Grip® material.

## AIR PISTOLS

sporty and elegant

### MODEL LP.@ ANSCHÜTZ COMPRESSED AIR:

The new compressed air pistol with shot stabilizer and new muzzle compensator.

#### Trigger:

With the precise adjustment of the trigger it is possible to adjust trigger weight and trigger stop as well as the relation between first stage weight and trigger weight according to the individual requirements. The trigger weight is 500 g and corresponds to the ISSF shooting regulations.

#### Shot stabilizer:

The compensator facilitates the control of the muzzle reaction. The pulse, which is created by the shot, is eliminated by the stabilizer.

#### Sight set:

The sighting line can be adjusted individually for front and rear sight. The triangular aperture can be adjusted to 3.5, 4.0 and 4.5 mm and in length. The width of the sight blade is adjustable up to 5 mm.

#### Grip:

The Morini grip is adjustable in all directions and can be tilted, thus enables a comfortable and natural handling. In addition, the palm rest is adjustable in height. Test this grip!

#### Supplied with:

Triangular aperture, weight rod, 2 compressed air cylinders with manometer, special grease, screw driver, instruction leaflet with test target.

▲  
**ANSCHÜTZ  
SMALL BORE TARGET  
RIFLES:**

Target shooters all around the world use the renowned Anschütz target rifles with the famous Anschütz Match 54 action.

**SMALL BORE TARGET RIFLE 1907:**

- With new butt plate and cheek piece adjustment.
- Extremely short locktime.

**SMALL BORE SPORT RIFLE 1912:**

- For the Sport Rifle discipline up to 6.5 kg.
- With famous barreled action of Mod. 1907.

**SMALL BORE SUPER MATCH  
2013/690:**

- With 690 mm barrel length.
- Extremely short locktime.

▲  
**ANSCHÜTZ MODEL  
1913 in new Alu-Stock  
2213:**

Many national and international top results were achieved with the Anschütz 1913 Super Match barreled action. Now this barreled action is also available in the new Anschütz aluminium stock 2213.

- Extraordinary butt plate and cheek piece adjustment.

- Stock weight closer to the barrel axis therefore the recoil is absorbed at shot release.

- Pistol grip available in two sizes.
- Grip adjustable to the back, front and side.

- Stock 2213 also available with the Anschütz barreled action 1907.
